# **Token security detection**

open, permissionless, user-driven token security detection platform

0x4B7B224197965623FEc94bc6aA3F6aeeF9235Ba4

#### Check

Note: We can help you determine if a smart contract may be a scam, but there is no 100% guarantee and we are trying to do our best to detect all scams. The contract check is only used as a reference for users, not as a basis for contract judgment.

**Contract Creator** 

0xe35a...5f0952

Contract Owner

0xe35a...5f0952

# **Contract Security**

### **Contract source code verified**

This token contract is open source. You can check the contract code for details. Unsourced token contracts are likely to have malicious functions to defraud their users of their assets.

#### No proxy

There is no proxy in the contract. The proxy contract means contract owner can modify the function of the token and possibly effect the price.

#### No mint function

Mint function is transparent or non-existent. Hidden mint functions may increase the amount of tokens in circulation and effect the price of the token.

# No function found that retrieves ownership

If this function exists, it is possible for the project owner to regain ownership even after relinquishing it

# Owner can't change balance

The contract owner is not found to have the authority to modify the balance of tokens at other addresses.

#### No hidden owner

No hidden owner address was found for the token. For contract with a hidden owner, developer can still manipulate the contract even if the ownership has been abandoned.

### This token can not self destruct

No self-destruct function found. If this function exists and is triggered, the contract will be destroyed, all functions will be unavailable, and all related assets will be erased.

#### No external call risk found

External calls would cause this token contract to be highly dependent on other contracts, which may be a potential risk.

## **Honeypot Risk**

Buy Tax: 0.00% Sell Tax: 5.00%

Above 10% may be considered a high tax rate. More than 50% tax rate means may not be tradable.

# This does not appear to be a honeypot.

We are not aware of any malicious code.

# **Functions that can suspend trading**

If a suspendable code is included, the token maybe neither be bought nor sold (honeypot risk).

### Holders can sell all of the token

Holders can sell all of the token. Some token contracts will have a maximum sell ratio.

# The token can be bought

Generally, these unbuyable tokens would be found in Reward Tokens. Such Tokens are issued as rewards for some on-chain applications and cannot be bought directly by users.

# No trading cooldown function

The token contract has no trading cooldown function. If there is a trading cooldown function, the user will not be able to sell the token within a certain time or block after buying.

# **Anti\_whale(Limited number of transactions)**

The number of token transactions is limited. The number of scam token transactions may be limited (honeypot risk).

### Anti whale is modifiable

The maximum token trading amount or maximum position can be modified, which may lead to suspension of trading. (honeypot risk).

#### Tax can be modified

The contract owner may contain the authority to modify the transaction tax. If the transaction tax is increased to more than 49%, the tokens will not be able to be traded (honeypot risk).

The blacklist function is not included. If there is a blacklist, some addresses may not be able to trade normally (honeypot risk).

# No whitelist

The whitelist function is not included. If there is a whitelist, some addresses may not be able to trade normally (honeypot risk).

# No tax changes found for personal addresses

No tax changes were found for every assigned address. If it exists, the contract owner may set a very outrageous tax rate for assigned address to block it from trading.
